Kautschukbelag mit interessanter Materialkombination aus dauerelastischem Kautschuk und richtungsfrei eingestreuten Granitsplittern. noraplan<sup>®</sup> unita wirkt durch die dezente Einstreuung sehr subtil. Das Design ist bewusst puristisch und natürlich.

Rubber floor covering with a perfect combination of permanently resilient rubber and randomly dispersed granite chips. The fine scatter of chips in noraplan<sup>®</sup> unita lends it a discreet appearance. The design is deliberately purist and simple.
